

EDIUS Jump Upgrade License

Activation Instruction

Confirm earlier version's license activation

EDIUS upgrade license requires earlier version's license for activation. Firstly confirm that earlier version has been activated or not in GV License Manager

- 1) Right-click on GV License Manager icon in Windows Task Tray then choose [License List] context menu.
* If GV License Manager icon does not exist, start GV License Manager from Start > Grass Valley > GV LicenseManager.
- 2) License list will appear. If earlier version's (one major version before) exists in white letters, required earlier version's already activated. If target earlier version does not exist, enter the serial number when activating upgrade license.
- 3) Close the license list window.

If earlier version has not been activated, GV License Manager will ask entering earlier version's serial number when activating upgrade license.

NOTE:

If you upgrade from either EDIUS versions, you will be asked to enter earlier version's serial number to activate Jump Upgrade License. Because, these version were not activated on GV License Manager.

- EDIUS 6
- EDIUS Pro 5, Pro 4, Pro 3
- EDIUS 2.0
